

103 Trox Standards

This hands-on course teaches the concepts, features, and functions of the Trox Standards product from a best practices perspective. Directors of IT Standards, Architects, Standards Managers, and Project Planners learn a methodology for standards analysis, planning, design patterns, waiver management, and auditing. The course includes six role-based modules.

COURSE OBJECTIVES:

Upon completion, the student will be able to create and manage a standards hierarchy, create and manage design patterns, manage standards lifecycle data, use standards waivers for effective project management, and use Trox Standards reports to optimize the standards portfolio.

COURSE TOPICS:

- Mod 1: Introduction to Trox Standards
 - Understanding the Purpose and Benefits of Trox Standards
 - Examining User Roles in Trox Standards
 - Understanding Trox Standards Terms and Concepts
- Mod 2: Managing the Standards Hierarchy
 - Planning Your Standards Hierarchy
 - Creating Trox Standards Data Manually
 - Managing Trox Standards Elements
- Mod 3: Using Design Patterns
 - Understanding Rapid IT Estimation
 - Planning Your Design Patterns
 - Creating and Managing Design Patterns
- Mod 4: Managing Standards Lifecycles
 - Review of Standards Lifecycles in Trox Standards
 - Planning Standards Lifecycles
 - Managing Standards Lifecycles
- Mod 5: Managing Projects and Waivers
 - Creating and Managing Projects
 - Using Waivers to Manage Standards Compliance
- Mod 6: Using Trox Standards Reports
 - Using Trox Standards Reports
 - Exporting Trox Standards Report Data

COURSE PREREQUISITES:

Completion of *125 Trox Fundamentals* recommended.
