

## 112 Trouw Architect Advanced Applications

This course teaches advanced topics and builds on the *111 Trouw Architect Essentials* course to give the student additional practical hands-on modeling experience.

### COURSE OBJECTIVES:

Upon completion, the student will be able to develop more complex and professional-looking models using Trouw Architect, use advanced techniques for developing model analytic capacities, import data from CSV files, and manage complex modeling environments. Through a case study example, students will also build their confidence in model design and creation and working with Trouw Metaverse-based models.

### COURSE TOPICS:

- Trouw Architect Advanced Applications: Course Overview
- The Course Project Model: "Toward IT Organization Consolidation"
- Getting Your Model Started
- Understanding the Metamodel for Your Model
- Importing Data into Your Model
- Applying a Custom Layout Strategy
- Applying Custom Search Criteria
- Applying Custom Symbol Macros
- Model Evaluation and Presentation

### COURSE PREREQUISITES:

Completion of *111 Trouw Architect Essentials*, or equivalent experience, required.

### COURSE LENGTH:

Two days or 2 web-based delivery sessions.

### COURSE COST:

\$1650 per student. Call for a quote for private onsite training.
