

## 125 Trox Fundamentals

This course provides an introduction to Trox Transformation Platform's capabilities, functions, and interfaces.

This course is appropriate for teams new to Trox, providing a common vocabulary for deployment in their organization. The course also provides conceptual understanding and key skills for enterprise data managers that will use Trox Metaverse and Trox applications. The course includes presentations, demonstrations, and hands-on exercises that are appropriate for business users, enterprise architects, administrators, and developers..

### COURSE OBJECTIVES:

Upon completion, students will have awareness of the capabilities available in the Trox Transformation Platform including Trox Metaverse, Trox Explorer, Trox Optimization, Trox Standards, and Trox Architect. Students will be familiar with Trox concepts and terminology, know how to use the web-based repository interfaces, and have an understanding of the tasks related to Trox Transformation Platform data management, administration, development, and deployment.

### COURSE TOPICS:

- Overview of Trox Beginnings and Trox Metaverse
- Key Trox Concepts and Functions
- Managing Metaverse Data
- Reporting and Data Analysis
- Modeling with Trox Semantics
- Trox Deployment and Security Overview
- Trox Professional Services Methodology

### COURSE PREREQUISITES:

Basic computer skills required. Knowledge of modeling concepts recommended.
