

301 Maintaining Troux Metamodels

This self-paced course teaches administrators how to manage the metamodel in Troux Architect and the Troux Metaverse and prepares developers for advanced courses.

COURSE OBJECTIVES:

Upon completion, students will be able to maintain the Troux Semantics metamodel and design and create metamodel extensions that are compliant with the Troux Metaverse.

COURSE TOPICS:

- Troux Metamodel Management Overview
- Review of Troux Semantics Framework
- Using the Troux Architect Metamodel Developer
- Modifying Troux Semantics Types
- Creating Extensions to the Troux Semantics Metamodel
- Generating and Staging Repository Schemas
- Configuring Model Data Marshalling
- Using Troux Query Language (TQL) in Troux Architect
- Creating Metamodel Templates
- Metamodel Best Practice Guidelines

COURSE PREREQUISITES:

Completion of *125 Troux Fundamentals* required. Completion of *221 Troux Metaverse Administration* recommended.

COURSE LENGTH:

One-half day, self-paced

COURSE COST:

\$825 per student
