

329 Developing Trox Reports (BIRT Edition)

This hands-on lab course focuses on using the open-source BIRT (Business Intelligence Reporting Toolkit) Designer application in concert with the integrated Trox Reporting framework to develop high-quality visual reports within the Trox Transformation platform. The course focuses on presenting information in textual, tabular, columnar, and graphical formats and on delivering reports in multiple formats, such as HTML, PDF, MS Word, and MS Excel.

COURSE OBJECTIVES:

Upon completion, students will be able to create and deploy professional reports using the Trox Reporting system. Students will learn how to create brand new reports as well as how to modify standard Trox product reports.

COURSE TOPICS:

- Introduction to Trox Reporting
- Datamart Design
- Creating Trox Reports Using the BIRT Report Designer
- Working with Report Data
- Formatting Reports
- Using Basic Formulas and Conditional Formatting
- Using Charts
- Advanced Reporting Features and Best Practices

COURSE PREREQUISITES:

Completion of *125 Trox Fundamentals*, or equivalent experience, required. A deep understanding of reporting systems and SQL recommended.

COURSE LENGTH:

Two days or 3 web-based delivery sessions.

COURSE COST:

\$1650 per student
